# Presentation Series

## from 8:00 to 8:45

### The Cloud: The New Normal

**by Brian Beach • F-100**

Cloud has become the new normal for computing, either to deploy new applications built for the cloud or to migrate existing applications to gain new efficiencies. Start-Ups and traditional Enterprises are adopting cloud because the old rules of scale and capital investment have changed. Come learn how over 1 million active customers have embraced AWS as a way to innovate faster than ever while reducing their security and compliance risks.

### How to Run Applications in Multiple Cloud Environments

**by Doneyli De Jesus • D-103**

Accelerate customer success by enabling production-ready Big Data analytics across multiple cloud and hybrid cloud environments. In significant numbers enterprise companies including Adecco, Airbnb, GoPro, Nielsen, Novantasand others are running Big Data on public cloud infrastructure. This session is a demo.

### Colocation

**by Svetlana Sidenko • E-199**

Each IT Professional needs to know about IT Service Management and how to provide the best service to their customers. ITIL is a IT Service Management (ITSM) best practice which has been used for the past 25+ years, and its longevity and extended usage validates its value. Join our session to learn why ITIL has been adopted by thousands of organizations worldwide and how to become ITIL certified.

# Prize-giving and Closing Ceremony

## from 9:00 to 22:00

**Room F-100**
